**AVFAB RECEIVES INDONESIAN APPROVAL FOR INSTALLATION OF AFT  
JUMP SEAT IN BEEHCRAFT B300 & B300C (350) AIRCRAFT**

**Clinton, MO – November 27, 2012** – Aviation Fabricators (AvFab) recently announced they received Indonesian approval for the installation of their STC approved King Air aft jump seat kits in Beechcraft B300 and B300C (350) aircraft.

AvFab received EASA approval on installation for all 100, 200, and 300 (including the 350) series King Air aft jump seat kits in April 2010. In addition, AvFab has a U.S. STC and Brazil STC for the seats.

The jump seats fold down from the side wall of the aircraft in the aft baggage compartment. The seats are interchangeable with the OEM jump seat and can utilize the existing OEM installation hardware if the aircraft is so equipped. If the aircraft has not been previously equipped with an installation kit, the AvFab kit can be used to make the installation.

The kit includes all installation hardware, brackets, parts, the seat (un-upholstered), complete restraint system, life vest, overhead lights, vents, oxygen drop-downs, and installation instructions. AvFab generally has kits in stock and available for immediate world-wide shipment.

AvFab provides inspection, repair and overhaul of corporate aircraft interior components, and is also an FAA-PMA producer of custom aircraft seating, parts and components. AvFab's sister company, Central Airmotive, is a comprehensive supplier of Original Equipment Manufacture interior products such as seats, divans, tables, toilets, cabinets and dividers. Central Airmotive currently has over 90,000 sq. ft. of OEM seats and cabin components. Together they represent a "one-source" solution to any corporate aircraft interior need. For more information on this or any other product or service offered by AvFab, please visit their websites at
