

Mods that Make Dollars and Sense

**Aviation Fabricators**  
Aviation Fabricators is a Federal Aviation Administration - Parts Manufacture Approval (FAA-PMA) facility specializing in the design and production of interior products for the Corporate Aviation community. All production items are approved under Supplemental Type Certificates (STC). We also welcome the opportunity to design and obtain "single-use" approval to custom-build a specific product for a customer who has unique needs. Emphasis is placed on couches, divans and seats/seat modifications.

King Air 90 & 200 Series Interior Upgrade Package

We put the  
**SOURCE IN YOUR RESOURCE:**  
your completion center, our materials.

When you upgrade your legacy King Air 90 or 200 with our AvFabulous package, it's a win win. You get enhanced design plus improved functionality and comfort to enjoy today, while increasing your aircraft's resale value for tomorrow.

Developed by the aviation experts at AvFab, the AvFabulous approach allows you to mix and match budget-conscious mods to upgrade your cockpit and cabin. Choose one or do them all:

**Arm Ledge Table System, Pleated Window Shades, Lateral Tracking Seat Bases, Aft Jump Seat Kit, Clear View Hidden Headrests, Side-Facing Seat, Crew & Passenger Seat Repair**

**BEFORE**

**AFTER**

**ARM LEDGE TABLE SYSTEM (AFTER)**

# ARM LEDGE TABLE SYSTEM

The centerpiece of the AvFabulous interior upgrade package is the AvFab Arm Ledge Table System (ALTS). Unlike the OEM tables which have two shallow cup holders that are only accessible when the tables are deployed, the AvFabulous tables offer four deep cup holders that are accessible at all times. The table mechanisms also are more robust and require much less effort to deploy and to store. In concert with the new tables, the new sidewall panels incorporate the new C90GTx and 250 style arm ledge. The sidewall features an integrated outboard armrest rail which modernizes the aircraft and allows more usable room on the seat surface.

## Models: King Air 90, 200

**Features:** Two tables, side panels, arm ledges, STC, installation instructions and parts, etc. No upholstery is included. Tables delivered in green condition, unless optional laminating is chosen. Drink holders built into top of table eliminate the "flip out" drink holders.

**Approvals: FAA STC: SA1638WI**

**Options:** Tables can be trimmed in teak, oak, maple, mahogany, walnut, ash or basswood. They are provided either ready for the installer to complete the finish work or AvFab can finish the tables and deliver them ready to install.

**Installation:** Requires the removal of the original sidewall panels and replacing them with the new composite panels. While there are variances in King Air series, installation time will normally run between 70 and 90 hours depending on the experience level of the technician(s).

**Lead Time: 10 to 20 working days**

**BEFORE**

# AFT JUMP SEAT

The AvFabulous Aft Jump Seat kit includes seat, occupant restraint system, oxygen system and installation instructions. It is delivered in "green" condition without upholstery. The seat folds to retain baggage space.

Models: King Air C90, C90A, C90GT, C90GTi, E90, 200, B200, B200GT & 250

**Features:** Right-hand seat folds down from aft baggage compartment sidewall. Kit includes the seat, complete restraint system, floor board, all fittings, brackets, hardware, life vests, oxygen lines, comprehensive installation instructions and STC.

**Approvals:**

FAA STC: SA00635WI

EASA: 100422580

Brazil: 2005S12-02

Canada: C-14-0155

China: VSTC0745 for C90A, C90GT, C90GTi

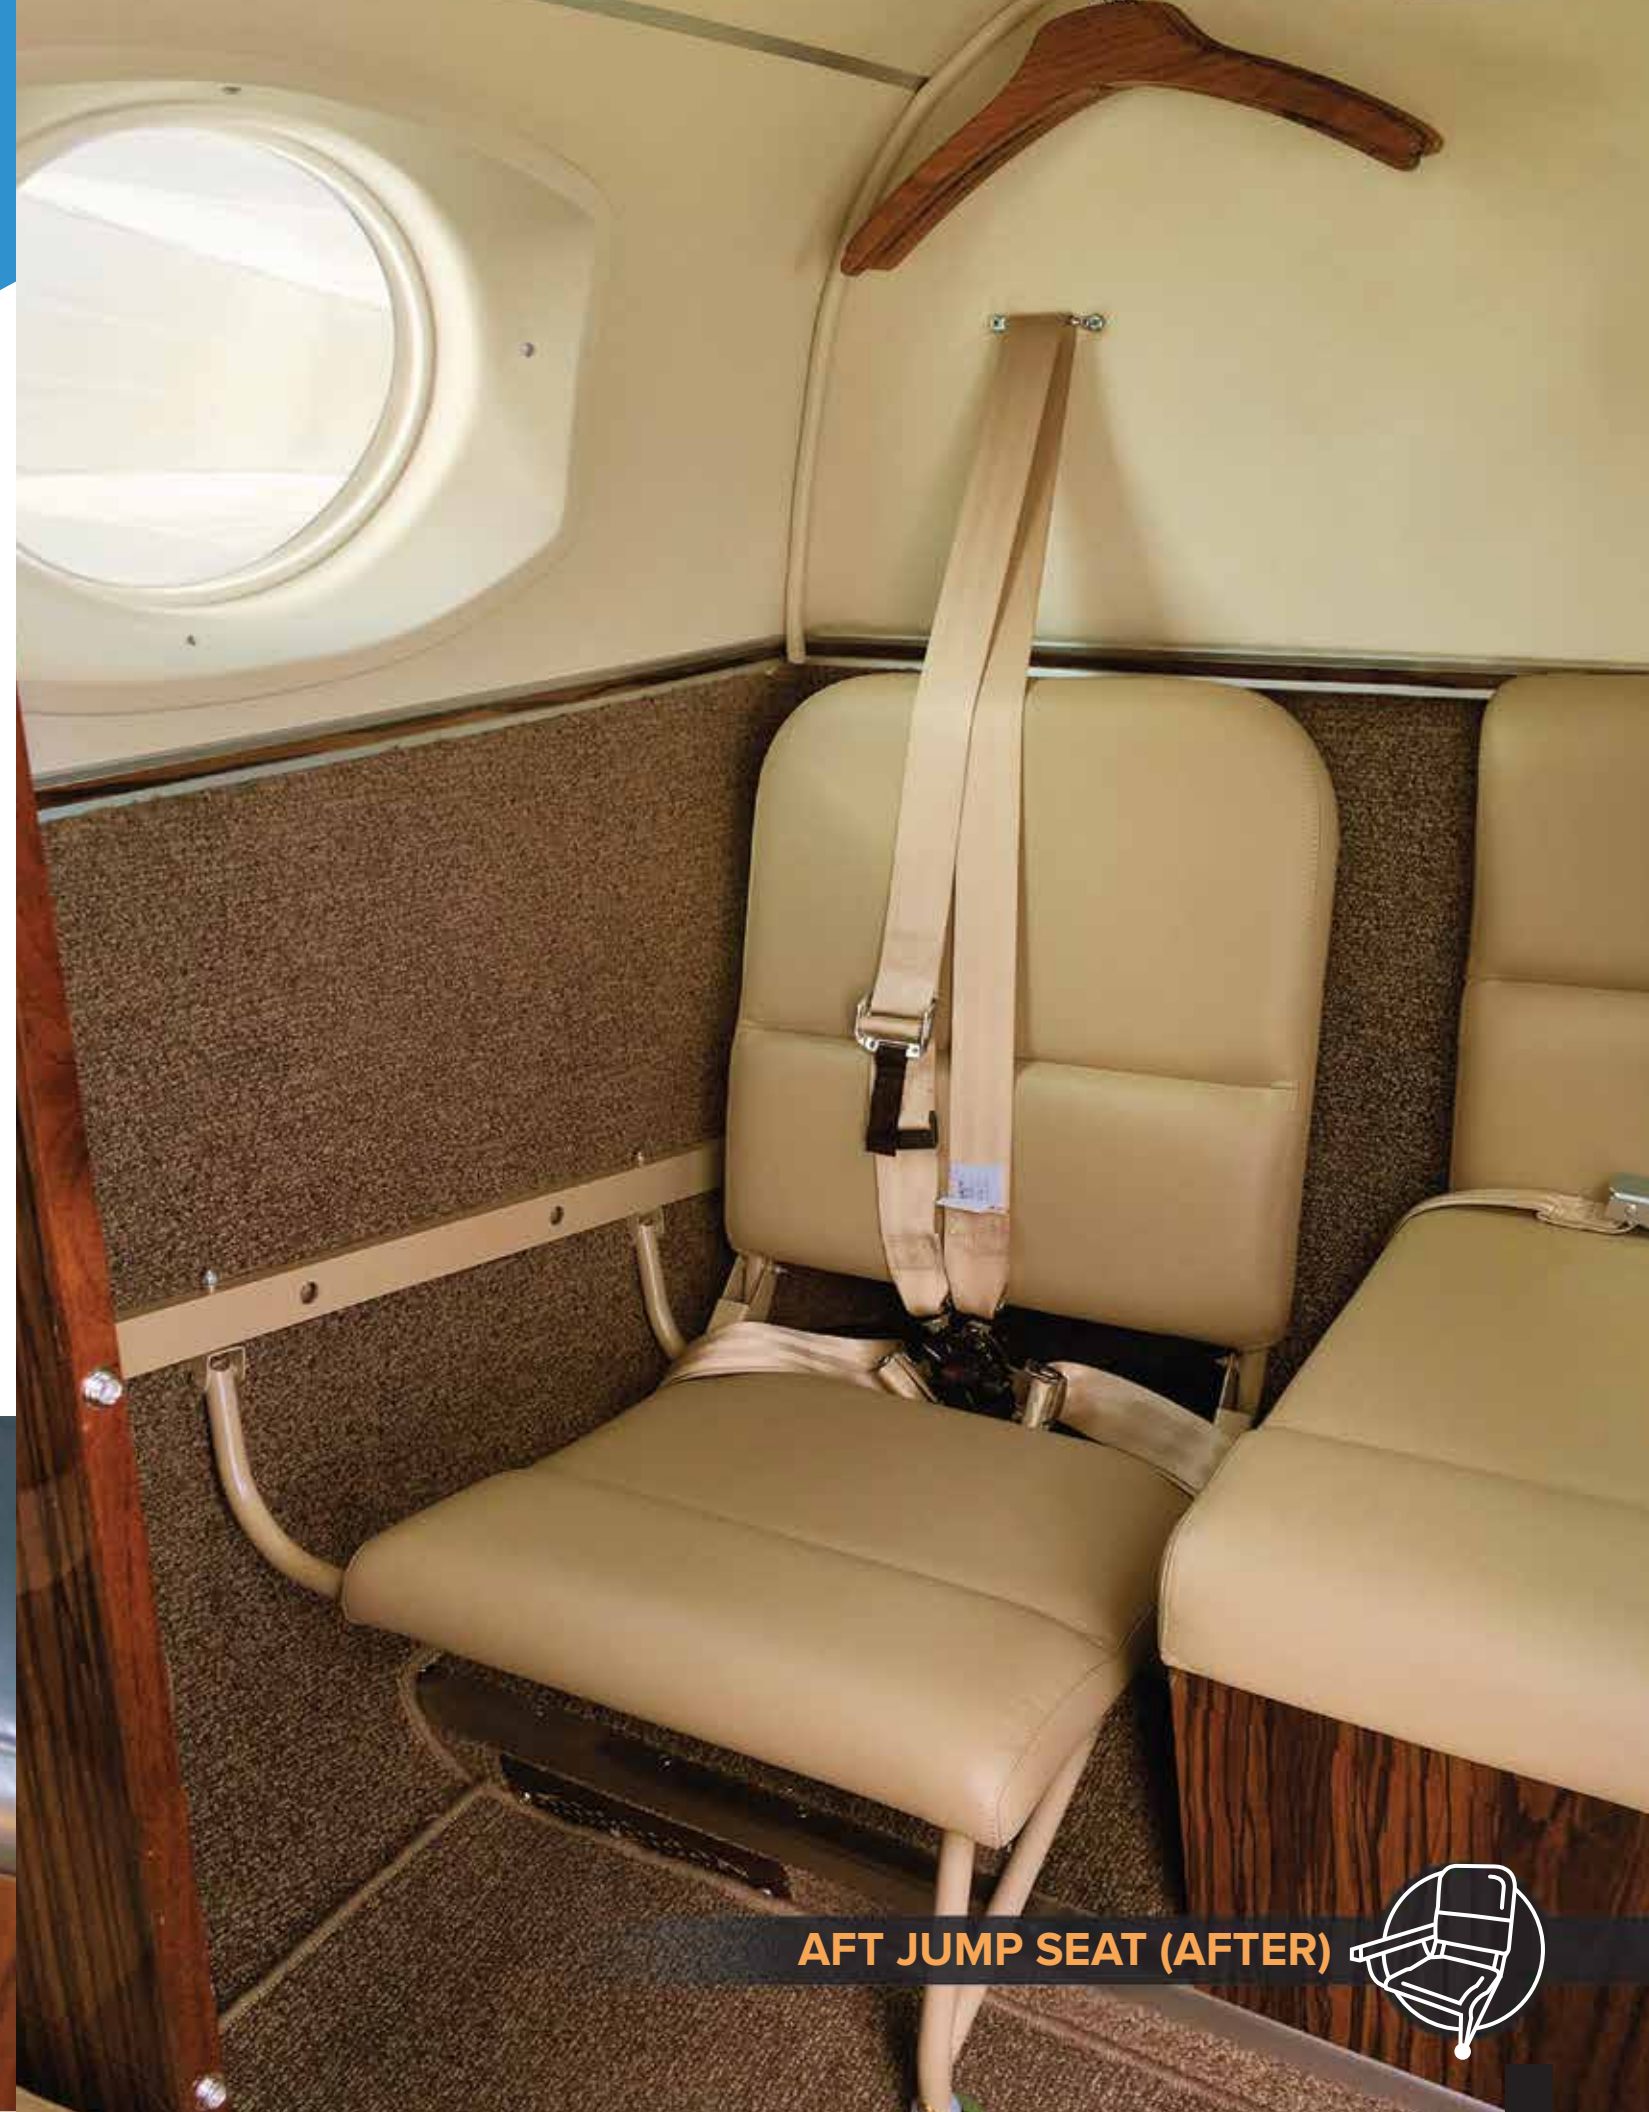

Mexico: IA-245/2014

Various other foreign approvals

**Options:** Seat upholstery and painting of the seat frames.

**Installation:** Normally 60 to 70 hours depending on the experience of the technician.

**Note:** Installs on right side of aircraft only.

**BEFORE**

**AFT JUMP SEAT (AFTER)**

**PLEATED WINDOW SHADES (AFTER)**

# PLEATED WINDOW SHADES

Replace your factory Polarizers with AvFabulous pleated window shades. The shades update the look and functionality of your King Air in addition to improving cabin comfort. The shades have no toxic content, are flame retardant, have an anti-bacterial coating and product no toxic smoke or gases during a fire.

**Model: King Air 200 (STC), 90** (Field Approval, STC pending)

**Features:** Excellent sun protection, as low as 4 percent light transmission, and heat reflection up to 75 percent resulting in less sun damage to your interior. Insulating properties reduce heat loss 20 percent. Kit includes everything necessary to convert the aircraft from Polarizers to the AvFab window shades. Total weight is 2.2 pounds per window. The AvFab window shades use the same mounting attachments as the Polarizers. Kit is complete with everything needed for the installation, including comprehensive installation instructions.

**Approvals:**  
**FAA STC: SA01672WI and PMA for 200 series 8110-3 required for other models**

**Options:** Available in variety of hues to compliment any interior.

**Installation:** Installation time for a ship set of 11 is approximately 20 hours, depending on the experience of the technician. King Airs with overhead light bulbs attached to the window line/headliner panels will have no problem. Earlier model aircraft with the light bulb fixture mounted to the airframe will need to relocate the fixture.

**Lead Time: In stock, normally 3 days.**

**BEFORE**

# LATERAL TRACKING SEAT BASE

Gain 3.5 inches of side clearance and correlating head room with lateral tracking seats versus OEM seats. Our AvFabulous lateral tracking base uses the factory seat. The mod is typically performed in the field and doesn't require reupholstery of the modified seat. The replaced non-lateral tracking base is traded in. The item can be sold as an outright or exchange purchase

## Model: King Air 90, 100, 200

**Features:** Lateral tracking seat base improves passenger head room and side panel clearance for greater in-flight comfort while retaining factory seat and appearance.

**Approvals: FAA STC: SA00453WI & PMA (no need for field approval)**

**Options:** Base can be painted to match color.

**Installation:** The kit comes complete with all hardware and comprehensive instructions. After the new base is painted to the desired color and the existing base is removed, the lateral tracking base can be installed in less than one hour.

**Lead Time: Lateral tracking seat bases are normally in stock; however, fluctuations in demand may result in a 30-day delivery delay.**

**BEFORE**

**LATERAL TRACKING SEAT BASE (AFTER)**

**CLEAR VIEW HIDDEN HEADRESTS (AFTER)**

**CREW & PASSENGER SEAT REPAIR**

### Clear View Hidden Headrests

AvFabulous Clear View hidden headrests improve cabin sight lines, giving the cabin a larger, more open look. A simple and inexpensive way to modernize the interior. The STC-approved headrests replace existing plug-in headrests.

### Crew Seat Repairs

Let the AvFabulous team perform a thorough inspection of your crew seats and repair or mechanically refurbish them. Paint and reupholstery services are available. The repairs are CRS approved and the items are returned to service via an 8130-3.
