

PC-12 Medical Stretcher

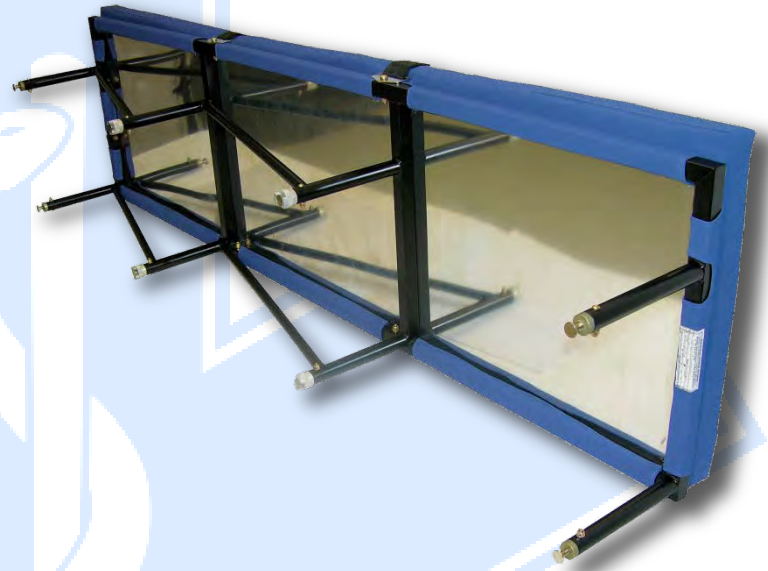

PC-12 Stretcher

PC-12 Stretcher

PC-12 Stretcher

Description: This stretcher kit provides a Pilatus PC-12 operator with the option of transporting an ill or non-critical patient. The kit was designed as an economical alternative to complete medevac systems. This unit is ideal for those operators who don't need critical care medical equipment.

Models: PC-12

FAA / STC: SA01825WI

Approval: Federal Aviation Administration Parts Manufacture Approval, PMA, and Supplemental Type Certificate, STC, (eliminating the need for field approval).

Features: Kit includes stretcher base and cover, Ferno 12-1 portable litter, mattress, mattress cover (conforms to FAR 23.853 horizontal flame test), restraint system, installation instructions, and weight and balance data, etc.

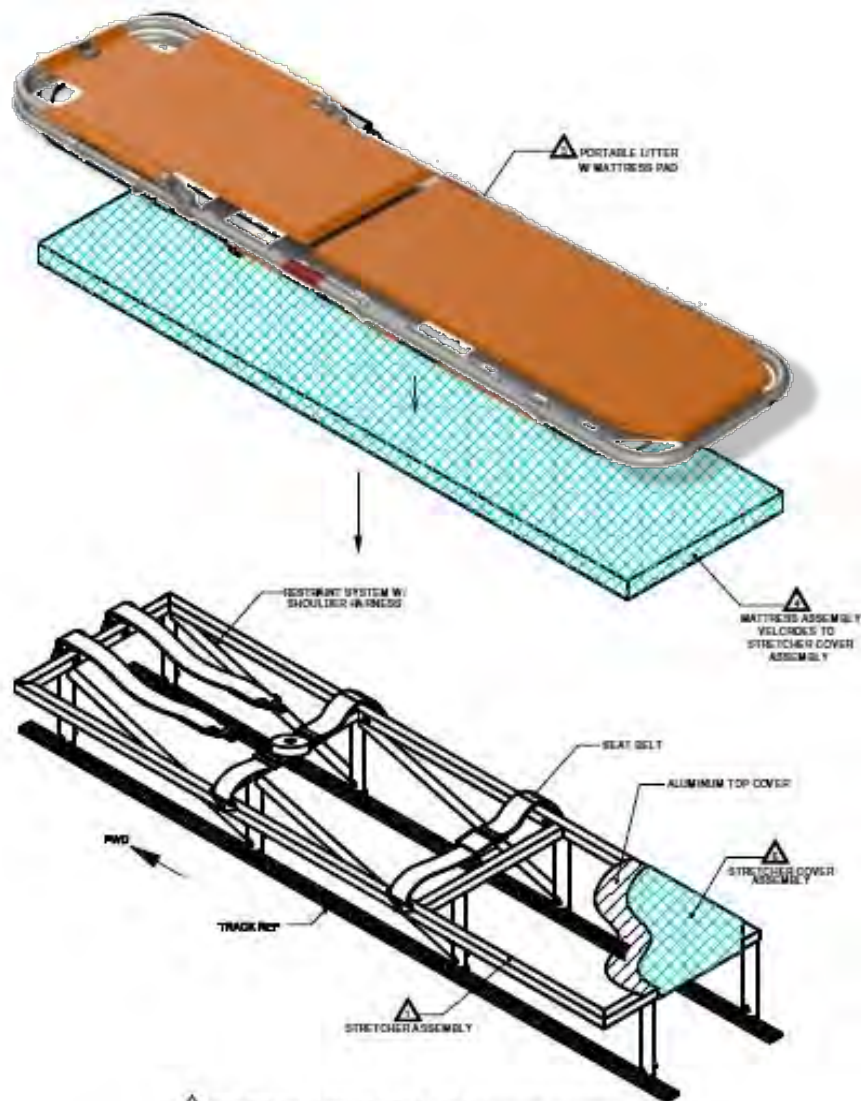

Installation: Initial installation can be accomplished by simply removing the seats on the applicable side of the aircraft and sliding the stretcher on existing PC-12 seat track.

Lead Time: Stretchers are normally in stock and available for immediate world-wide shipment, however, fluctuations in demand may cause up to a 30 day delivery delay.
