

# Traveler Seat

# Traveler Seat Details

**Description:** This is by far the most reliable and durable King Air High Density Airline Style Commuter Seat available today! Lightweight, ready to go to work, and can be delivered with upholstery! Delivered in "green" condition, without upholstery (upholstery is optional). It is important to note that we have never had a request for a spare part or repair for any of our high density series of seats, so they are extremely durable.

**Features:** AvFab's Traveler Seat is engineered for lightweight durability and affordability, with elements that make it conducive to maximum high density applications. It was designed to enhance the ease of occupant ingress and egress, by increasing leg, knee, foot room, and passenger comfort. It is best-suited for applications where maximum seating is desired. Seat features forward folding back and includes lap belt, life vest pouch, and cushions (un-upholstered). Various floor plans are available for both forward and aft-facing Traveler Seats.

**Installation:** No airframe modification is required other than removing existing seats and furnishings, and sliding the new high density seats onto original seat rails (complete installation instructions, diagrams, and weight and balance information are included in the kit). On some models of the King Air, a table plug is recommended for aesthetic purposes. Bare Traveler seat weighs 22 lbs., Aft-Facing Traveler seat weighs 28lbs.

<b>Approvals:</b>	U.S. STC:	SA2774CE	200 & 300 (350) series
		SA2775CE	100 & 99 series
